1 Game Overview

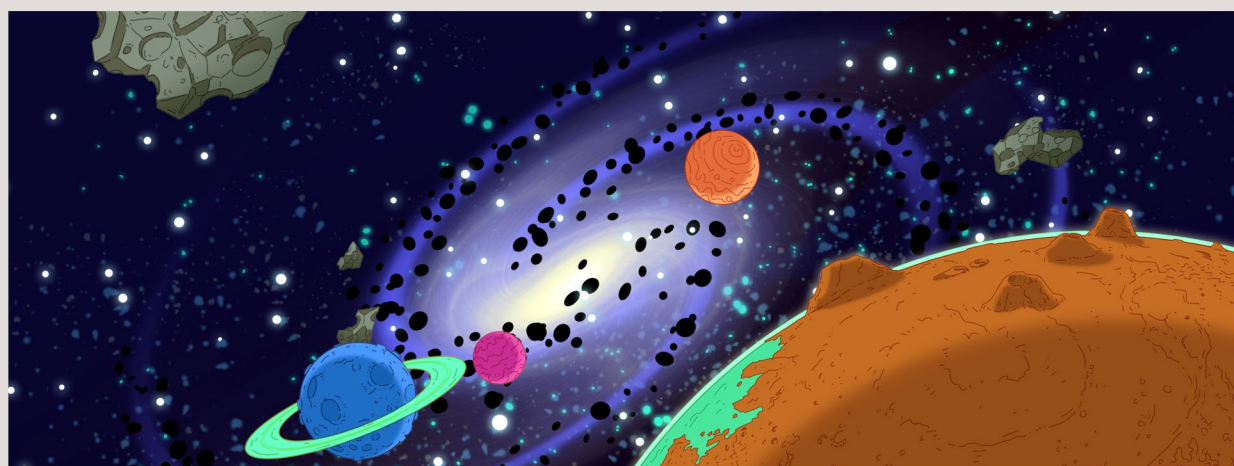

Miracle Game is the first epoch-making hero and metaverse themed war simulation strategy game going live on the Miracle Universe platform. All heroes, props and lands in the game are presented in the form of NFT, making it possible that the players hold ownership of the game assets, and the assets can be circulated globally. NFT in the game can boost a healthier and broader growth of digital games in the secondary market. The game is also the first hero themed strategy game developed by Montgomery Singman's team against the backdrop of Miracle Universe.

2 *Game Background*

The chaotic universe reopened after tens of thousands of years. Coming out of the big bang, six tribes, namely, Protoss, Terran, Dragon, Spirit, Demon, Submariner, appeared in the world. The continent is occupied by Terran, Spirit and Demon, three tribes engaged in a series of wars in order to expand their territory. The Demon, with a warlike quality and the support of the Dragon, inflicted deadly blows on the Spirit and the Terran. The Spirit and the Terran temporarily allied to resist the Demon and the Submariner, and successfully banished the latter and divided the continent. Due to years of war, the Terran and the Spirit are greatly wounded and need a rest for rejuvenation. Meanwhile, the Demon is deliberately plotting the next revenge plan in order to survive and hold back.

At the same time, the Protoss and the mysterious Dragon showed up again. The Protoss helped the Terran raise heroes in order to resist invasions and kill the Demon. However, gradually the Protoss found out that the war stemmed from a big plot devised by the Dragon, who had been attempting to control the entire universe. However, the Protoss had a disagreement and began to fall apart. A force in the dark is intruding. The peaceful continent is about to be broken in. A war is delicately poised. The core team of Miracle Game and the players will together create a world of miracles, stand up to all tests and compose another legend.

5 *Gameplay Introduction*

Miracle Game is an adventure strategy game with multiple heroes. The game has been launched in the central city with adventure, PVP challenge and hero staking, both playable and sustainable. Tournaments and land buildings will be opened soon in the central city to make the gameplay more diverse.

6 *Tactics*

Miracle Game is an adventure strategy game with multiple heroes. The game has been launched in the central city with adventure, PVP challenge and hero staking, both playable and sustainable. Tournaments and land buildings will be opened soon in the central city to make the gameplay more diverse.

7 *Adventure Breakout*

Players can form their own hero team to enter the adventure mode and start to break through the levels, which will be upgraded according to the level of difficulty. Players can send the best team to fight according to the level of monsters and formation and get rewards for winning or losing the battle. The hero experience can upgrade the hero level, and resource rewards can be used for hero advancement.

8 *Matchmaking*

When the player reaches level 12 or above, he can enter matchmaking mode. Match Battle will automatically match the corresponding battle team according to the battle power of the player's battle team. Each match battle needs to consume energy and resources, but winning the match battle can get a generous blind box reward, and there is a chance to get a new powerful hero.

9 *Hero Staking*

Either the adventure or match mode can challenge the hero's combat power and attribute ability. What if his combat power is too weak? Join the hero stake game quickly. No matter what kind of the hero's combat attributes are, you can get many resource rewards as long as you stake for a period. It's completely free. You simply need to wait for the benefits.

10 *Pet Blind Box*

In Miracle Game, besides heroes fighting as a team, the role of pets in assisting fight is also crucial. Pets don't join in the fight directly, but a combination of different pets may determine the battle arrays and positions available to the troop. So it involves tactics and antagonism. The players may also pick out pets of different grades randomly in the store with MU tokens. Assistance to fight and evolution can be activated when a pet is raised to a certain grade.

11 *Hero Tribes and Camps*

The six tribes in Miracle Game belong to three camps: Order (Protoss and Terran), Chaos (Demon and Dragon) and Nature (Spirit and Submariner). Order restrains Chaos, Chaos restrains Nature, and Nature restrains Order. (Order, chaos, nature, the three are like tarot cards, one restrains the other.) Restraining opponents in battle will deal extra damage, and being restrained will reduce damage.

12 *Hero Quality and Skills*

Heroes will be endowed with random attribute growth and skill talent when they are created. According to the growth of combat power attributes, heroes can be divided into four qualities: N/R/SR/SSR. The higher the quality of heroes, the higher the growth attribute of combat effectiveness and the higher the training value.

Hero skills are divided into anger skills and passive talents, both anger skills, and passive talents are closely related to the hero tribe. The anger skills of the same tribe are similar, while some talents are specific. When matching the lineup, pay attention to the matching of hero tribes particularly.

13 *Miracle Blind Box*

After buying heroes with MU ecological tokens, the players can log into the Miracle Game world. In the Miracle Game world, Miracle blind box fragments can be obtained by participating in the PVP championships every day. After collecting 1000 pieces of blind box fragments, you can synthesize a Miracle blind box in the game. Open the blind box to get MG tokens and new heroes.

14 Territory

Miracle Game is divided into six zones. Meanwhile, each zone is subdivided into plots of territory measured by tokens. There are 10,000 plots of territory in total. These plots are represented in the form of NFT. Players can pledge MU tokens to obtain territory NFT, which can be traded in the market. A fixed MU service fee will be charged for each transaction.

Every plot of territory will have its unique ecology and produce local products, building materials and other resources depending on the zone in which it is located. The territory owner enjoys the priority to get any resources produced on the territory.

Artifact fragments	Can be used to make different hero artifacts to upgrade hero's capabilities.
Building materials	Can be used to upgrade the territory and boost the troop's power.
Decorations	Can be used to decorate the home and offer special fighting effects.

All resources produced on the territory can be traded in the built-in trading floor with MU tokens. The handling charges collected on MU transactions will be destroyed. Materials and effects that can be traded are described as follows:

15 Land Rental

Players can purchase NFT land in the game during the event, and the land will be the only place where tournaments can be held. Players who own land NFT can hold tournaments by themselves to obtain the rental income or put the land in the market to rent to other players. The player who rents the land can spend time and effort to get a certain rental share by holding tournaments in the game.
